PROFESSIONAL SUMMARY

Detail-oriented Computer Science graduate passionate about data transformation, organization, and business process improvement, with a growing focus on Data Analytics and Information Systems. Skilled in supporting digital operations through data management, reporting, workflow organization, and cloud-based collaboration tools. Proficient in Microsoft Office Suite, Google Workspace, customer support, and basic IT support operations, including computer troubleshooting, software installation, and system updates.

Analytical, goal-oriented, and eager to learn, with strong interpersonal and communication skills. Able to work effectively both independently and within team environments while maintaining professionalism, integrity, and a commitment to continuous improvement and smarter business operations.

TECHNICAL PROJECTS

11/2025 – Present

Data Management & Digital Operations

Self-paced practical projects using Google Workspace, Microsoft Access, Excel, Cloud storage tools, and workflow automation tools.

- Built Excel and Google Sheets performance dashboards using formulas, KPIs, and automated reporting structures to support organized business reporting and data tracking.
- Designed and implemented structured Microsoft Access databases with tables, forms, queries, and reports to improve data entry, retrieval, validation, and record accuracy.
- Developed automated reporting workflows using Google Apps Script, Google Sheets, and Gmail integrations to streamline scheduled performance reporting and reduce repetitive manual tasks.
- Created a dynamic certificate generation workflow using Google Sheets and Google Docs templates, enabling bulk creation of personalized certificates and significantly improving processing efficiency.
- Built automated lead capture and tracking systems using Google Forms, Google Sheets, Gmail, and Make.com  integrations for real-time data collection, notifications, and workflow coordination.
- Organized collaborative and secure cloud-based file management systems using Google Drive and OneDrive to support structured document storage, accessibility, and information management.
- Applied strong data validation and documentation practices to maintain accuracy, consistency, and organized reporting standards across projects.

EDUCATION
